What is Nulled

Nulled is a forum that launched back in 2015.

There are roumors about Oxide being the first Owner and Finndev taking over the forum. But the truth is it's just Finndevs multi

Nulled started as a cracking forum but over got bigger and bigger over time. The forum Moderators added many new sections as the community grew more and more.

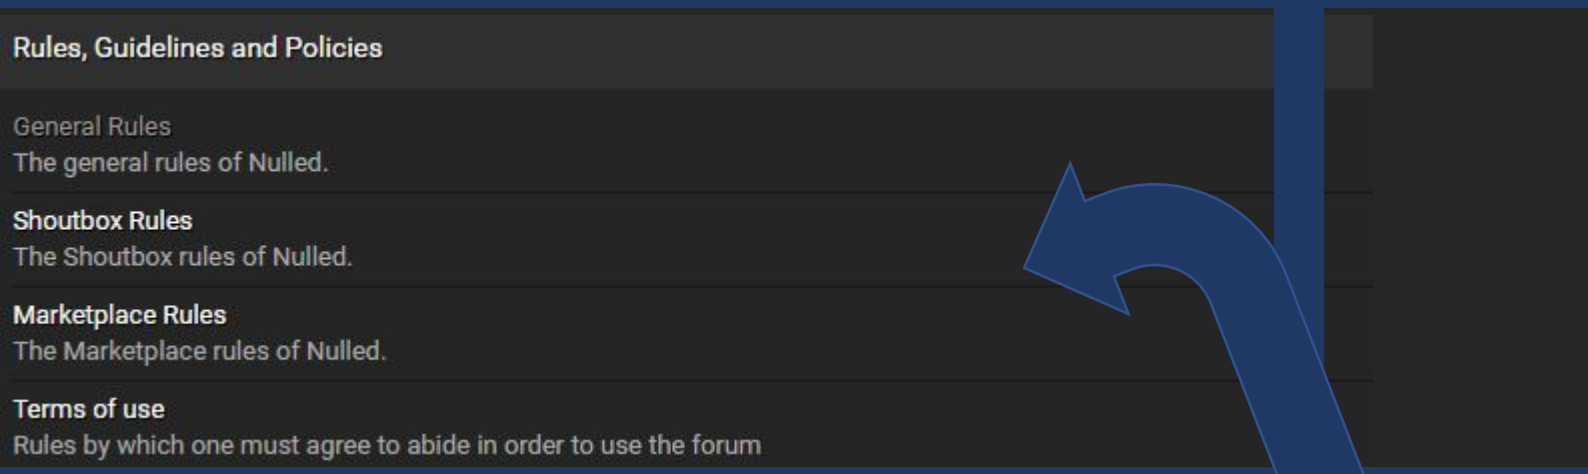
And YOU are part of it now.

Rules

First of all this forums has some rules which you have to accept when you register. Most people dont read these but I would recommend you read trough them.

Scroll down on the page and at the bottom you can find a link to the rules and FAQ there are questions answered that you might have

(Forum Rules and FAQ)



Rules, Guidelines and Policies
General Rules
The general rules of Nulled.
Shoutbox Rules
The Shoutbox rules of Nulled.
Marketplace Rules
The Marketplace rules of Nulled.
Terms of use
Rules by which one must agree to abide in order to use the forum

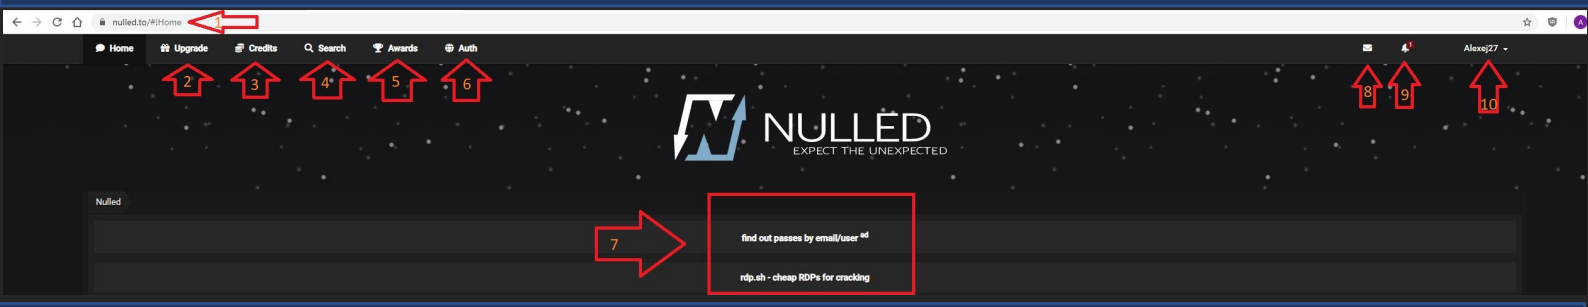
It’s a big Forum and there are different places with own Rules

As example the Marketplace has own rules that you need to know (should)

Same with the Shoutbox and rules that you have to follow everywhere

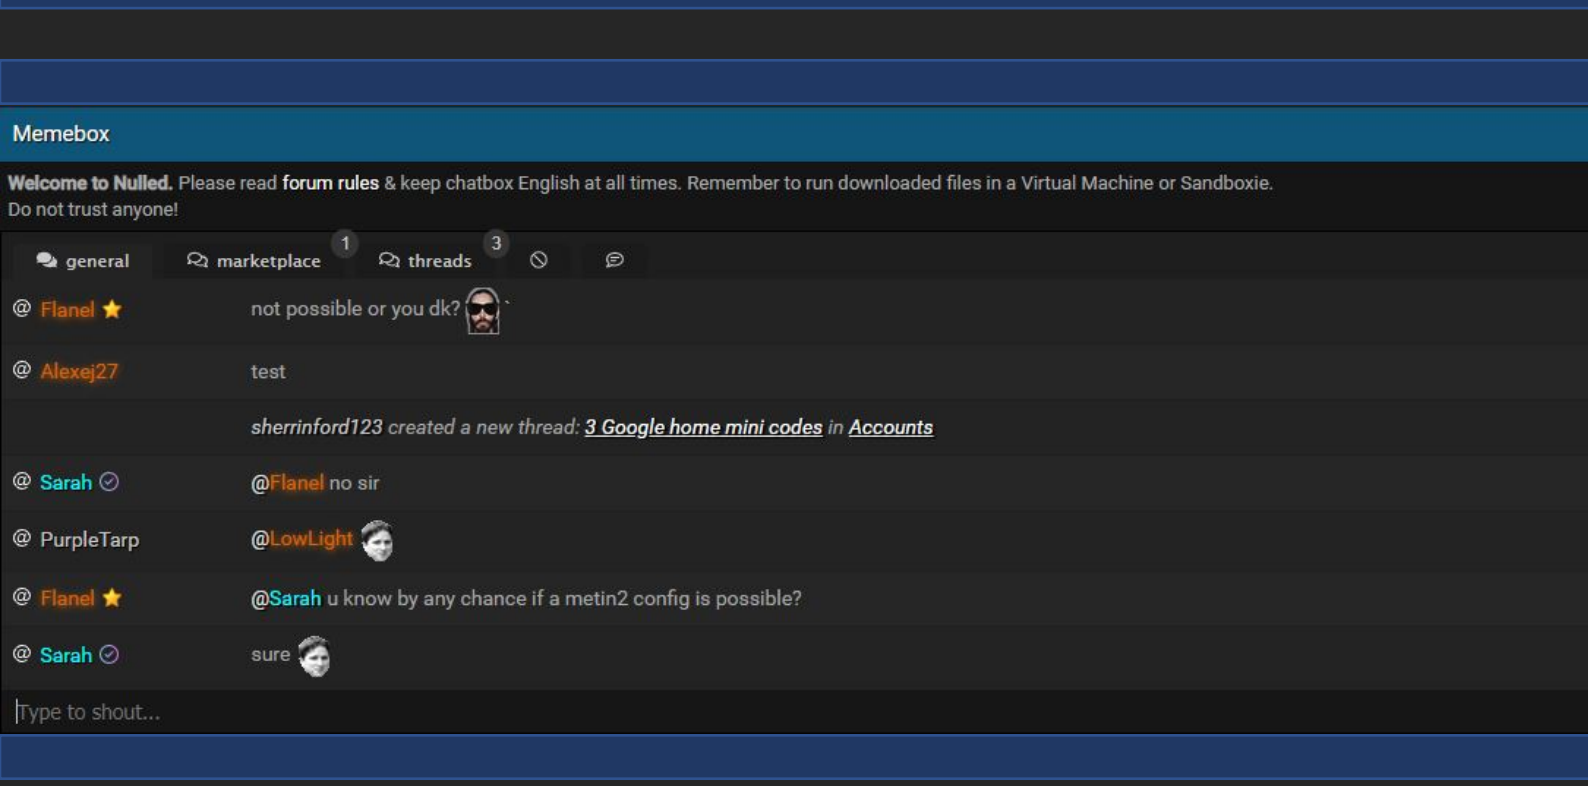
Exploring

When you join Nulled there are many sections and things to explore so I will explain them and insert pictures below with explanations.



Picture **1 : Imgur Link**

1. The Website (URL)
2. You can upgrade your Account with a paid membership (Vip,Aqua,Nova)
3. You can also buy and use credits there (1 credit = 1€)
4. Search function to look for Topics or Members
5. Shows existing Awards and requirements (explained later on)
6. For some tools on Nulled you need a Auth Key which you only get if u meet certain requirements
7. Paid Ads by someone
8. Messenger for private Messages
9. Notifications (If u receive Reputation or get a private Message for example)
10. Your Forum Profile



Memebox
Welcome to Nulled. Please read forum rules & keep chatbox English at all times. Remember to run downloaded files in a Virtual Machine or Sandboxie.
Do not trust anyone!
general
marketplace 1
threads 3
@ Flanel not possible or you dk?
@ Alexej27 test
sherrinford123 created a new thread: 3 Google home mini codes in Accounts
@ Sarah @Flanel no sir
@ PurpleTarp @LowLight
@ Flanel @Sarah u know by any chance if a metin2 config is possible?
@ Sarah sure
Type to shout...

Shoutbox / Memebox

There are 3 Sections (general, marketplace, threads)

You need 25 posts to write in the shoutbox and it has its own Rules

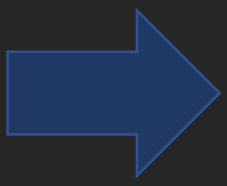
Threads tab shows you every new created thread (sometimes it gets stuck tho)

In the marketplace everyone can run a free Ad message for whatever they sell

Information and Advertisement

It shows information about you like your credits (currency) and if you have 2FA activated (I have it disabled)

Current cryptocurrency's Value it updates itself and it can rise or go lower. BTC is a cryptocurrency that is mainly used in the Marketplace



Paid Ads that you can purchase

Here you can see "Infinityblack" - a combo provider

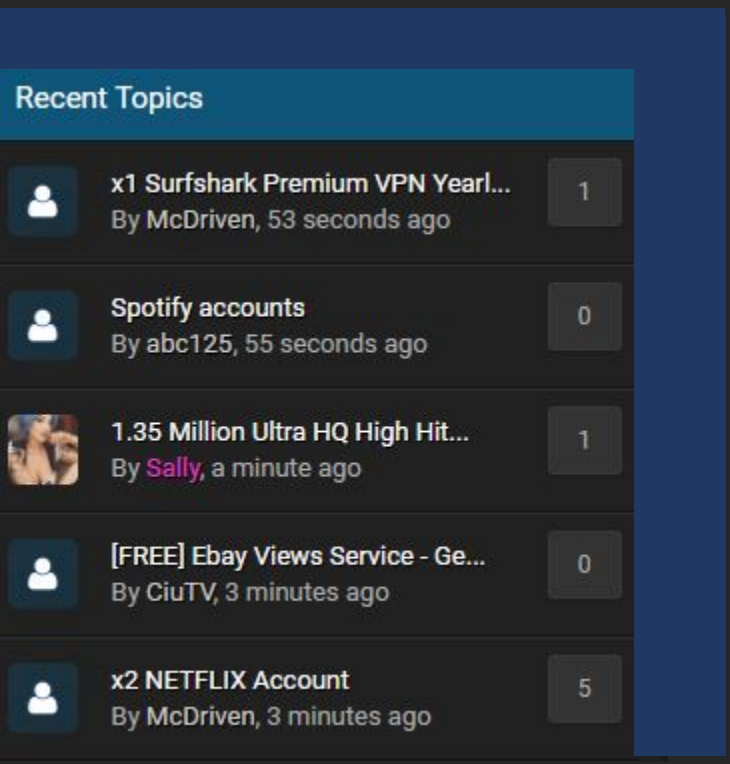
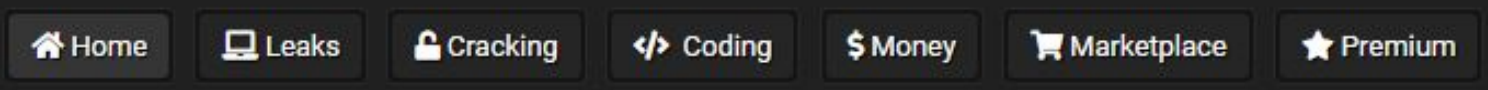
Top left shows the latest activities of forum Members

Top Middle show recently created threads within the Marketplace section

Top right shows given reputation in the red box you can see that Stringslave gave me +rep :pepolove:



Below are recently created threads. Same as in the Shoutbox Threads tab.



Home: The Main page it has a section for Support and general stuff where you can talk about random stuff.

Leaks: You can find many things there from cracked related things such as accounts, databases, mobile apps, eBooks (digital book) , source code (coding) and other leaks (tutorials mostly related to porn).

Cracking: as already explained Nulled firstly was a cracking forum and it has it's own section regarding cracking where you can find tools, help, tutorials, proxies and combos.

Coding: Contains programming, hacking and reverse engineering

You can ask questions there or take source codes and learn things

Money: there are Monetizing methods regarding Internet or real-life + social engineering and e-whoring (later explained). There is a own section for Amazon.

Marketplace: People can sell products or services there are also illegal services & products you can buy from there.

Premium: you can only open the Section when you have a paid membership! There is a chat, premium leaks and dumps (combos & accounts).

Leeching

After Discovering the many sections you may have tried to open a thread but there is a high chance that you saw something like this :

[Hidden Content]
Hidden Content
You'll be able to see the hidden content once you reply to this topic or upgrade your account.

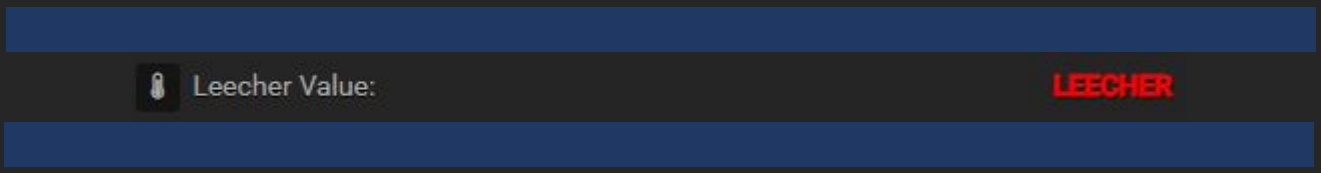
This means you need to reply or upgrade your Account in order to see the content

There are 2 good threads about it so I rather link them here as its easier

Link 1 : "click here"

Link 2 : "click here"

These links are explaining "Leecher" and the value behind it.
Summarized: if you unlock too much content without contributing or interacting in other sections your profile will look like this :



If your profile looks like this above (^) you are a "Leecher" to remove this you need to contribute or write in other sections I recommend Home/Lounge or post a tutorial if you know any. I lowered my value back then with trying to help other users or answering questions this way you contribute and lower your Leecher Value also you might get likes.

If you are only Leeching on nulled without any kind of contribution the chance is very high that you will get banned after some time.

Some sections as example Combos (Inside Cracking) requires 10 posts to unlock content. There are other sections that have the same requirement such as Accounts and more.

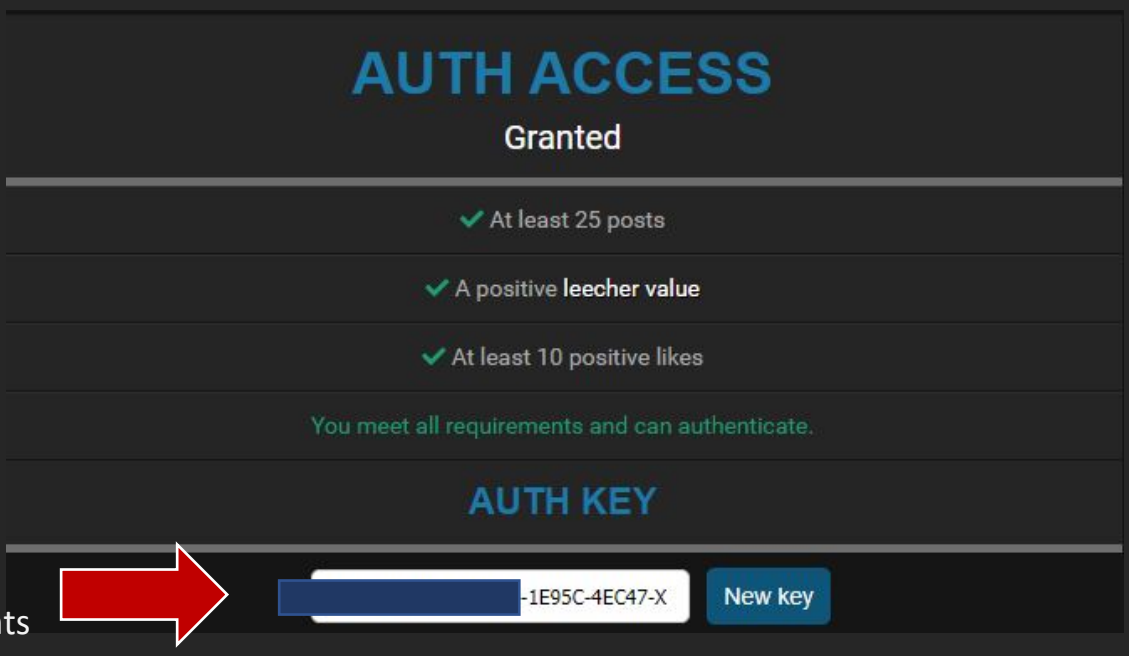
Auth

After going through the Sections, you might see the release section if not here is a link

Release Section Link

There are many tools from Developers and most of them are Nulled exclusive such as crackers, Giftcard generators ,Viewbots and cracked programms … overall many tools for many things but when you download them and try to open you get a window that requires you post a code. The code can be found here (link)

Your Auth Key if you have the requirements



You can see the requirements. You can get the first one by just posting 25 times.

Leaking/contributing and if you leech your value will go down which means you can never get access

So you need to contribute or Leech less. Last but not least you need 10 likes or more. You can get these by again contributing to the community (I got my first 100 by helping other Users).

Downloading

Nulled can be a dangerous place full of Viruses, Trojans / Rats and Bitcoin stealer or similar so don't download stuff. There is a simple rule:

Don't download stuff from grey people that have 10-20 Posts or less

Even if there is a Virustotal scan or similar as long as its not approved by a disinfector

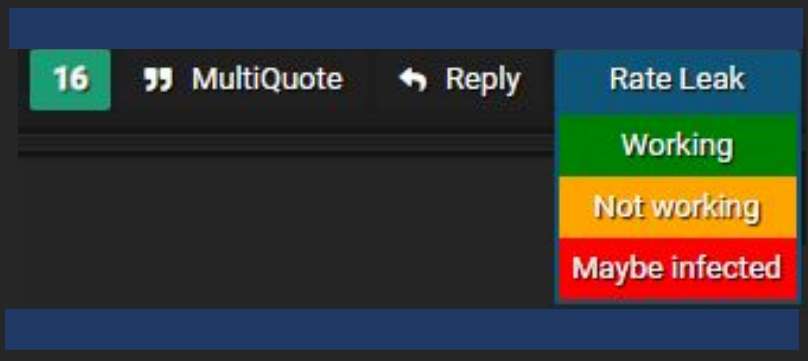
Sometimes even bigger Members repost stuff where they don't even know if it contains any malware or similar.

A way to protect yourself is getting a Virtual Machine here is a link to one (Virtualbox)

But its even easier if you simple don't download everything

You can also rate some Leaks

If there is a red Text under a Leak which says it has been reported as infected I would highly recommend you to NOT download it.



Upgrades

You might think you don’t want to leech or cant contribute and unlocking auth takes to long then there is a easy solution for you : **upgrades**

Your own personal @nulled.to email
Buy Nova

Either open the link of the imgur or zoom the pdf

Its clear what you get so I won’t go into that but its good and worth as you can learn a lot and there are many ways to get back your money

I bought VIP 2-3 times and then made money and bought Aqua from the profits

Payment methods are Bitcoin , Ethereum , Amazon Giftcard

It also shows paysafecard but its not possible you need to buy with it a AMZ GC

Some Member offer a service where they upgrade you with Paypal

If you want to pay with Amazon Giftcard you have to keep in mind that you will have to wait for a Staff to manually upgrade you. It can take 1 Month but often it takes about 1 to 2 Weeks depending on how busy Bleach is. (the current Admin)

Benefits from Upgrading

-unlock hidden content without replying (you can call it stealth leeching)

If you are leeching or open a clickbait title thread you might get disappointed but yet you expect something good and then later you have a red “leecher” and easiest is to create a new account but creating dozens of accounts and email takes time and contributing too so best and easiest way is upgrading so people cant see your leeching and wont complain

- you can learn a lot. No matter if it’s basic knowledge or handling any program. Coding related stuff or just talk to the community.

- people generally belive that you don’t get banned in Shoutbox if you do something that’s against the rules IF you are a upgraded User. They name it Banshield.

- many people use their learned abilities to earn money off the website. For example some refunders get huge income from just refunding for people. Use this to your advantage and start a business to maybe live from Nulled.

- you are less a pleb (low quality user)

- also you get the other stuff from the pictures above

Upgrading

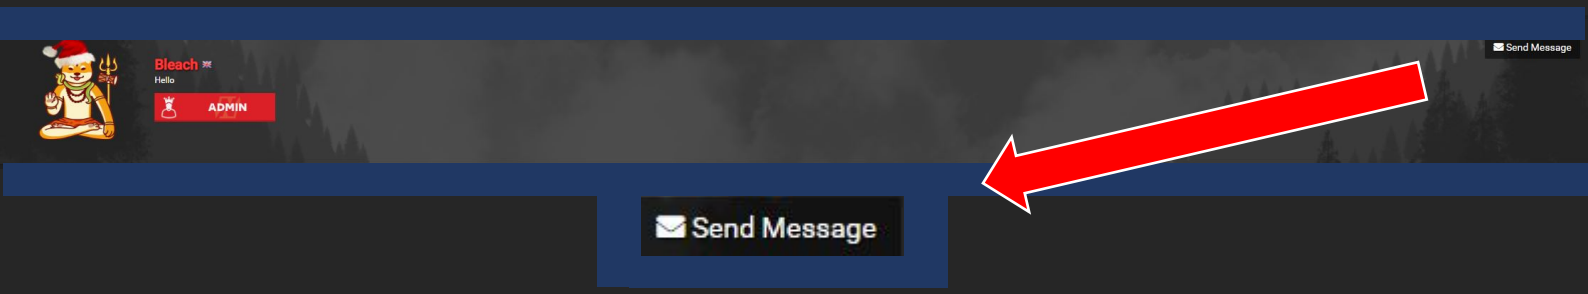
Here I will go through the process for upgrading as written above there are 2 ways : Cryptocurrency and Giftcard (Amazon)

I will first explain Amazon as its easier and faster

Go to a Giftcard store : Kinguin, g2a, amazon or any local store

Now buy the Giftcard keep the receipt if you can and send him the code over the Nulled private message

Keep in mind its easier but it takes much longer



Other way is cryptocurrency in case you don't know it's a digital currency. You can check the value in the mainpage (explained in page 6) the value can rise or go lower.

To use it you need a cryptowallet you can imagine it's like a small bank or Paypal which you can store money in but digital money.

We will focus on Bitcoin you can also pay with Ethereum but Bitcoin is more common so now you need to find a Wallet provider you can simply google Btc wallet or similar.

I use the wallet from blockchain it doesn't require ID or other verification

Only if you want to buy Btc with a Creditcard / Bank but it's safe and you can easily use it. Feel free to use a different one but I only had good experiences with them

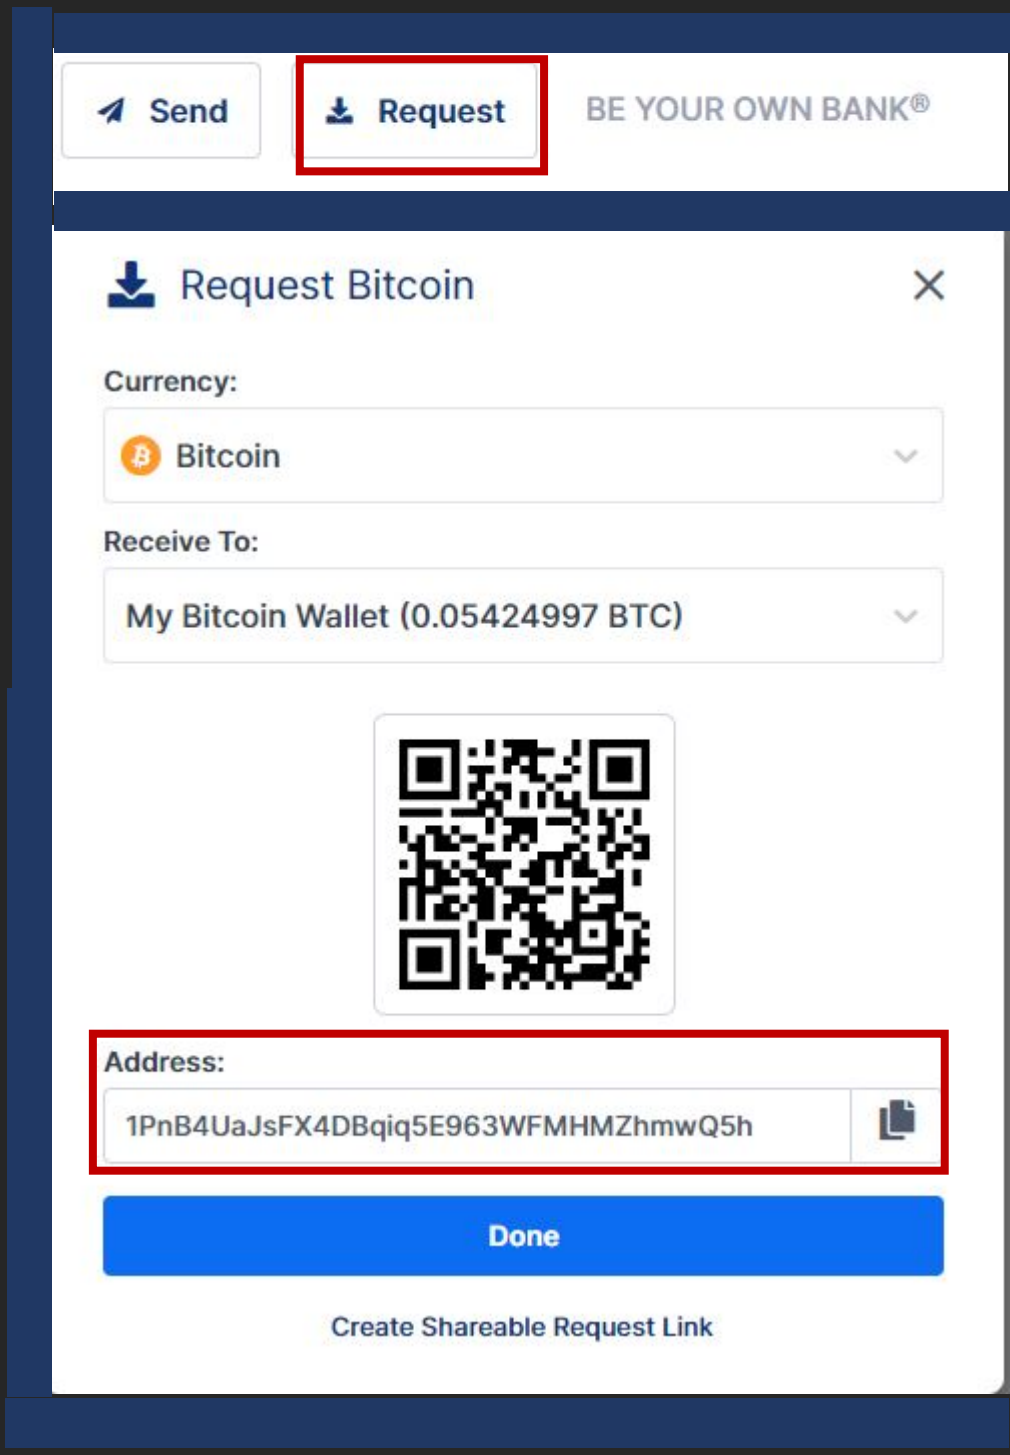
Create a account and then log into your Account and follow the screenshots

Click on Request

Choose Bitcoin

Here is your BTC addy

Copy it. People need that to send you Money. This Address is unique and tells the Sender where to exactly send the virtual money.



Above was explained how to create an account and receive money

But you need to pay money to Bleach so next will I explain how to get BTC what I used was Cryptovoucher

It's Giftcards for Bitcoin

(Link to cryptovoucher)

You can buy it directly buy it in some wallets or depending on your locations there are BTC ATM´s

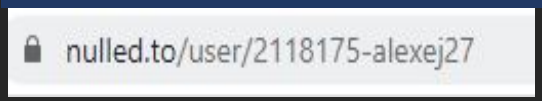
Paxfull there are 355 ways to buy bitcoin there I don't know many or what

Verification they use but if you want to buy bitcoin you often hear them

Exchangers be carefull and don't get scammed I will write later about using the marketplace but its one way that you can use

They need your Bitcoin address so they can send you Bitcoin now as before explained in the page before copy it and send them to it now wait until you receive it and the exchanged money you can use to buy your desired rank

Open their shoppy or click on upgrade and buy. Choose the rank type in your email if you have to and uid if not choose bitcoin and then you will



Click on your Profile in the top right and the number in your link is the UID

You will see a bitcoin address and and an amount you need to send it to

I will post below here an imgur link which explains it more.

Imgur Link : (click here)

Shoppy

Shoppy.gg is a website created by Finndev the current Nulled owner

There are alternatives or similar websites as example selly.io / rocketr but selly has more restrictions and is harder to use as seller and rocketr are smaller and unknown

Shoppy is a third-party website in which you can buy products or even some services its anonymous so the police won't burst your door open yet use common sense don't sell cp or carding related things neither should you buy such stuff

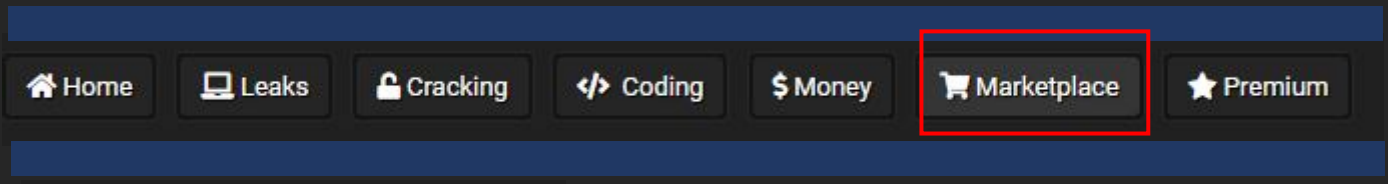
The website is beginner friendly and everyone can create a free account

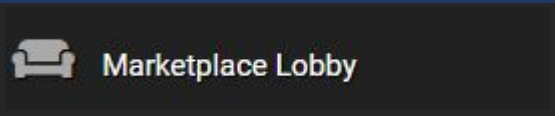
You can easily create a listing. There is also feedback/reviews which can costumer leave after they bought your Items or service.

You can accept payments in skrill and cryptocurrency or even Paypal

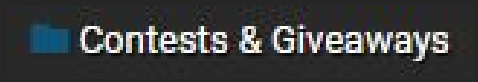
Marketplace

In case you don't know where the Marketplace is click here or check at the the above categories.

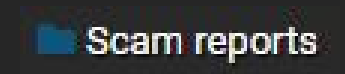




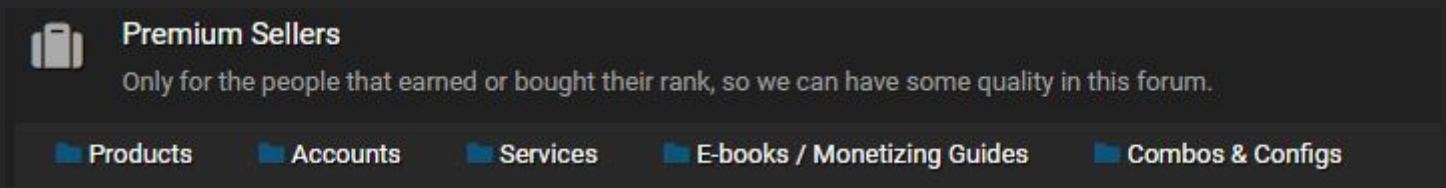
Marketplace Lobby – talk about the marketplace your opinion or concerns



Contest and Giveaway – Challenges and Giveaways by Staff and Members

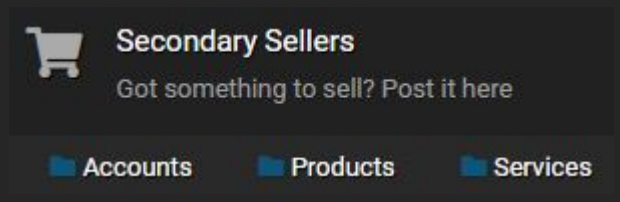


Scam reports – incase you got or have problems you can make a thread to solve it

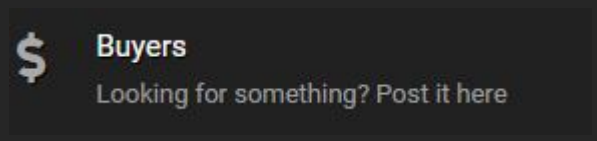


Premium Sellers
Only for the people that earned or bought their rank, so we can have some quality in this forum.
Products
Accounts
Services
E-books / Monetizing Guides
Combos & Configs

Premium Sellers – here you can sell ^ You can either click on premium sellers and then click on products,accounts… or directly choose it below premium sellers



Secondary Sellers – This requires 25 posts to post here. Grey people post here as they can't post in premium sellers

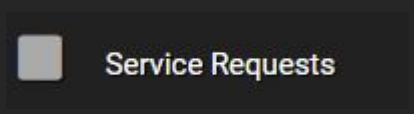


Buyers – if you don't find what your are looking for you can make a request there and people that have or can offer will contact you or maybe refer to.

Graphic Marketplace – this is to buy desings for many things to your needs also costum designs/requests

Trading Station – if you don't have money or want to offer a product / service for x (another product) you can post a thread here

Currency Exchange – ex. You got Paypal but want btc this is the place you can exchange money into another currency



Service Requests – similar like "buyers" but focused on services ex. An invite for website x or someone who can code something

Partnership & Hiring – you want someone to help you or search a partner for a business or to make something together

Favors & Rewards

Favors and Rewards – small tasks for small money

Difference between Premium and Secondary Sellers

Premium Sellers:

-More Structure

-More people will visit your Thread

-More trustworthy as you are upgraded

-Less people selling on it (compared to secondary)

-Less Chaos

-a better Average quality (compared to secondary)

-costs money

-depending on the section competition (but that's everywhere)

-it can happen that you don't profit as money is not guaranteed

Secondary Sellers:

-its free

-for new users good to start

-more chaos

-less structured

-much more threads

-scammers

-less visibility

Summarized Premium Sellers is better but it requires an investment of 10$ minimum never the less you should be careful when dealing with members in both sections secondary and premium

Secure yourself from scams

After browsing the marketplace, you might have seen a member with a post that you are interested and you want to buy it but now **STOP**

Think about how to secure yourself there are multiple ways but it depends on the product / service

-MiddleMan you involve a neutral trustworthy person which handles the deal and secures the deal or keeps the money until the product/service is provided

Members that have a MM Service are : Lucas , Jocker , Bleach

-Paying after delivery means if its an account as example you pay the person after you got your product or service most will decline it but if it's a service for example social engineering payment after tracking should be done

-confirming over nulled private message

-check impersonator there are people impersonating which means faking their identity and then trying to make deals (more about it on the next page)

-check unicode its so you can see if it's the real person or somebody else

-don't deal with new users

-wait for other people give feedback/vouches before buying

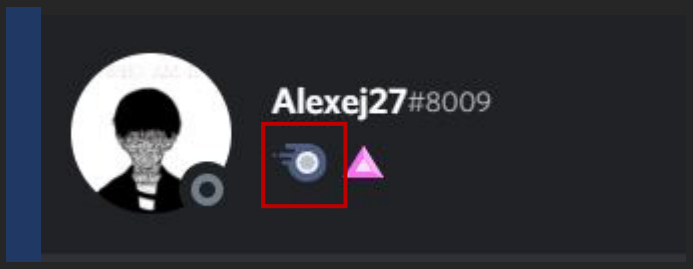
Impersonator

a popular way to scam is impersonating nulled is a big forum with many persons and many are simply not aware of impersonators and how to check for them

Lucas made a thread regarding it : (click here)

Known and easiest way to impersonate is that people switch as example L with I as l I looks similar.

Discord and Telegram are the most used communication ways on Nulled Telegram has profile links which makes it easier to deal but Discord doesn't have that and it has something called "discord nitro" which allows you to use Unicode in your name now the problem is that Unicode can be invisible numbers



If you got discord nitro you have the small badge which you can't remove this means this user can use Unicode in his name you can find a way to check if he is using it in the thread of Lucas but I will post it here again

Here is a link to a Unicode checker : (click here)

If its red avoid dealing with the member because it means he has invisible letters

Every Discord User has a unique ID you can activate it by going into the Settings and then activating Developer Mode

Gif to activating developer mode : (click here)

Now you need a message of the person or tag with a @ and then right click and copy ID

Gif of getting the unique ID : (click here)

So my user ID is : 198789995765432320 this is my Unique Discord ID

If you do this with a different person check if it's the same

I added a gif how to check the id without writing you don't need to be in a server you can use this also in private messages

Gif : (click here)

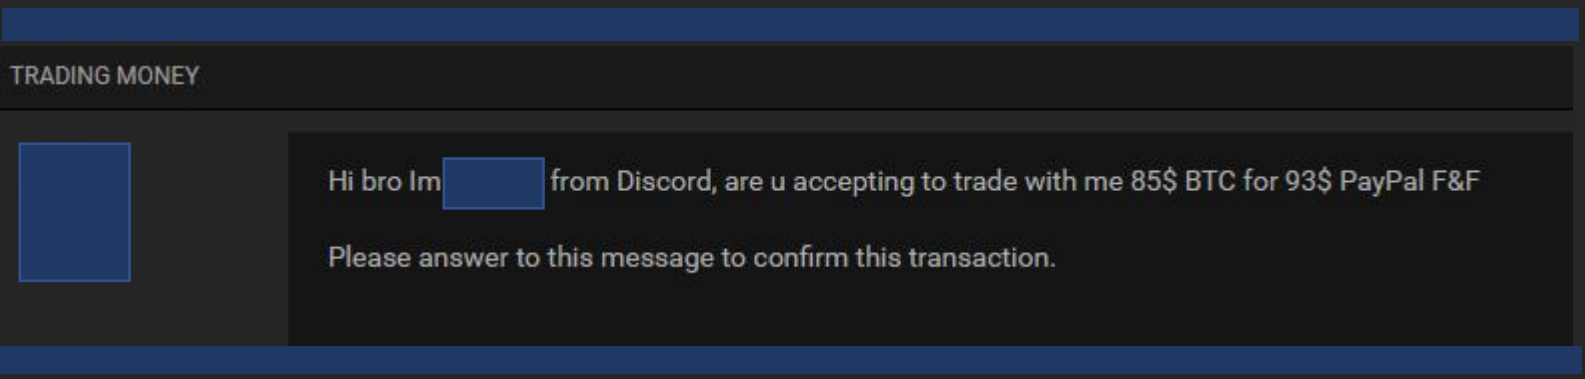
To use this properly you need first the unique id of the real person

Confirming

Another way to confirm is confirming over nulled private messages this wont work if you got ratted and the scammer has access to the account (rip sorano)

It works this way before doing the deal you ask person x to send you a nulled pm or you send them one and they need to confirm it

If they make an excuse like they can't or aren't at home simply wait or directly cancel the deal below is a picture how a proper confirmation looks as many users do it wrong.



TRADING MONEY
Hi bro Im from Discord, are u accepting to trade with me 85$ BTC for 93$ PayPal F&F
Please answer to this message to confirm this transaction.

The name is written where the person talked before and if he accepts

Also includes the trade value and wants an answer on this pm to confirm it

Many users simply want something as respond but this user I censored did it right and properly

Vouches/Feedback

You might already saw many sales thread as you were curios or interested and noticed sometimes people asked “vc?” or “vouch” this means they want the product for free so they can write a review but there is a part of the community who takes the product and then doesn’t make a proper review or don’t give proper feedback.

To ask for vouch you need 500 likes (royal)

If it’s an account store or similar its not that bad but if its an expensive product it’s important as a nulled member to write a “neutral vouch” feedback” because posts like

“good and he is friendly fast great support 100/10”

Doesn’t help anybody its good for the seller as its positive but its short and not about the product at all

Its hard/ can be hard to write reviews/vouches if you don’t know what to write or how you shouldn’t ask in first place but that’s just my opinion

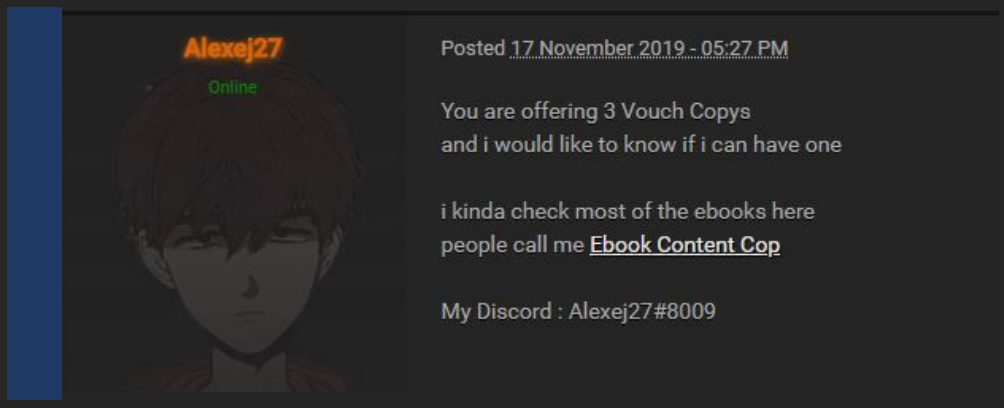
An alternative is copying a other style or checking other vouches for ideas what you could write I will use my Reviews I have done and or how I do them

Even though you didn’t think about it there are multiple ways to ask for a vouch copy the easiest is “vc?” / “vouch?”

You can also send the person a private message asking for vouch it’s ok if you follow the rules or are allowed to ask

When I ask for a vouch copy, I firstly ask if its available or if I can have one

And then reasons why I should get one and reviews I have done earlier for a quality check that I am not a vouch hunter and they have decent quality



Alexej27

Posted 17 November 2019 - 05:27 PM
You are offering 3 Vouch Copys
and i would like to know if i can have one
i kinda check most of the ebooks here
people call me Ebook Content Cop
My Discord : Alexej27#8009

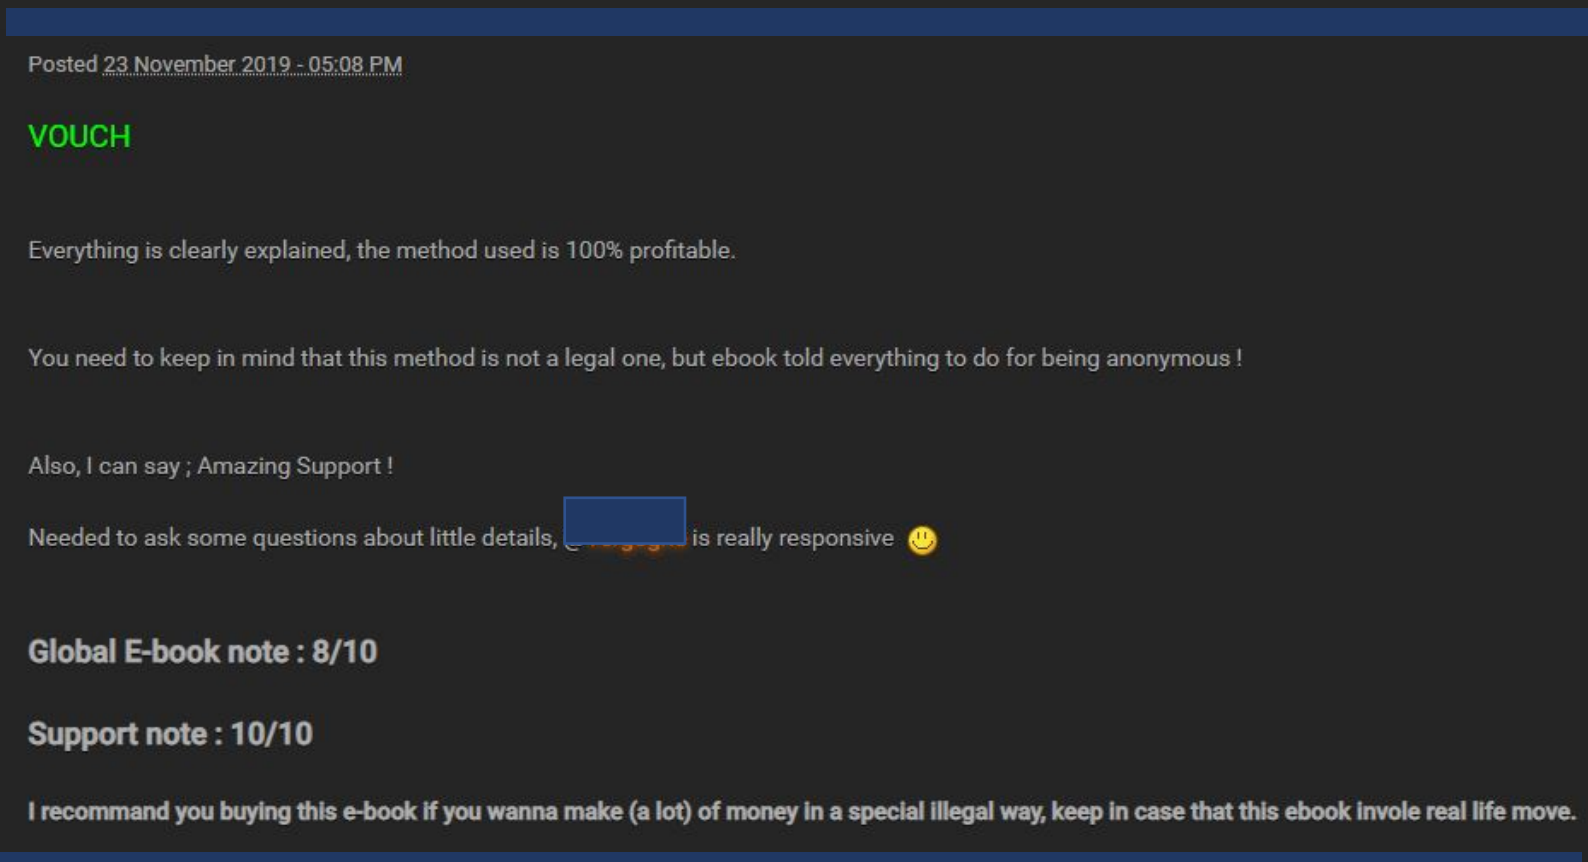
You might´ve already seen me
i kinda started asking vouches for most ebooks here
kinda makes me look like a vouch hunter
but i mainly only want vouches from ebooks
i try to make a detailed / neutral review
can send you some reviews done before as "quality check"
if its fine for you i would like to take one
i have knowledge about counterfait and have 1K+ Supreme replica 1:1 next to me
people call me ebook content cop
and i think i have generall good review feedback? (like its not a royal shit vouch)

You don’t have to follow it that’s just how I like it and prefer as this looks more professional and gives the Seller a chance to decide if he should give a vc

I will compare vouches as I write my most vouches in the eBook section

I will compare it to another eBook vouches as it isn't fair If I take a account review

Click the picture for a imgur to it or simply zoom



Posted 23 November 2019 - 05:08 PM

VOUCH

Everything is clearly explained, the method used is 100% profitable.

You need to keep in mind that this method is not a legal one, but ebook told everything to do for being anonymous !

Also, I can say ; Amazing Support !

Needed to ask some questions about little details, [redacted] is really responsive

Global E-book note : 8/10

Support note : 10/10

I recommand you buying this e-book if you wanna make (a lot) of money in a special illegal way, keep in case that this ebook invole real life move.

First point its short not detailed and if you could see the thread design he just confirms the points that the seller provided he doesn't talk about the eBook itself so costumers or people that are interested don't get information about it and can't properly decide if its worth or not as he only

writes the positive things and decorates it with x/10 x/100… I don't like these numbers as you can't explain them and everyone can just decide them randomly

Here is one of my reviews that I did recently (03.01.2019) you can directly see its much more detailed and longer / bigger it looks completely different

As this might be hard to read click on the picture to be redirected to the thread

Review

you can already see i asked for a vouch copy on the first page
i wanted already to write it earlier but i couldnt do it cuz of events like : birthday , christmas , new year
basically sorry for the delay even though its only partly my fault

This Ebook has 24 pages about 14 pages are explaining the ebook
the other 10 pages are introduction , support , or headers
its in the rectangle format

incase you dont know what counterfeits are its a replica or fake product of the original cloth
the goal is to get a replica/fake of the real product in a high quality that is very similiar and sell it

buying fake clothes for cheap and selling as real for double x4 the price

its kinda simple as the base idea is public or just nothing new anymore
find a replica store buy there and then sell
(i dont leak information he just provided them in his thread)

He focusses on one shop but provided also alternatives
i only had experience with one of them but i knew multiple of them either through the internet or simply knew them from an other ebook

the other ebook i am talking about is from a user named @Halpert he had also a counterfeits ebook and and parts are very similiar
but he also provided other information and in my opinion the ebook from @RDS is better than the one from Halpert as it goes more into detail
BUT some parts were still short and could be much more explained or with pictures

if you sell counterfeits many problems occur which some of them he did solve which i didnt thought of or got told it isnt a good idea but he explained to me thats its effective / good or simply how "bypass" it

he also added a google docs document which shows you what product is popular and can be sold for x amount of money
its good as it makes things easier to decide and shows you which clothes might be easier to sell

he wrote in his thread design that its working worldwide (i can confirm it) maybe excepts some third world countrys
and this cant be patched it could go saturated a bit which makes it harder but its rather unlikely
it is noob friendly to some extent but some parts are missing or shortly explained which then requires you to ask RDS it is noob friendly but i dont wanna say that you simply can do it in my case i had multiple questions

due to taking a vouch i asked many questions which he most of the time replied pretty fast (couple of hours) which is fine for me
but at the end he stopped replying? first i thought he was busy but then i simply noticed that i got ignored i was maybe a bit annoying (i wasnt rude but i think its rather due to my lazyness) but this shouldnt happen as its common that you get lazy costumers or ones with many questions

the ignoring or not answering stretched about a week this is also why the vouch took so long as i wanted to get help and do this method properly and then write it but now i just wanted to have it done

The review is mostly neutral I try to cover most important things or talk about the things that are in the thread design as often its misleading.

If you don’t know what to write get ideas from other people

Many people are lacking things what to write about so I will write some topics :

-Design

-Content

-Support

-Structure

-worldwide

-investment

-requirement

-age requirement

-investment method

-payment

-questions

-opinion

-seller itself

-product delivery

-addons or free stuff

-public or similar content

-how long it takes

-warranty

-proof

If you write about these or more you should write a detailed review

I don’t want to post every vouch I took but I will post a couple more but without the picture so basically only a thread or link to it as “template” or creativity boost

a Review for an eBook that is connected to social engineering and refunding

(click here)

a review for an eBook about a niche that is called “pod”

(click here)

A review for a bitcoin / crypto currency related method I have to be honest I wasn’t completely neutral.

(click here)

One of my first detailed vouches its compared small to the recent ones but I am improving myself which you can clearly see but its about a money method simply

(click here)

Try to get feedback regarding your vouches/review so you can improve it

Its for you good and the community as a whole

Making Money

There are many ways to make money but the main ways people focus here are

-Cracking

-Social Engineering

-E-whoring

-Monetizing in the internet

I will try to explain every of these above mentioned methods.

So you get a basic understanding.

I will go over things like how legal they are and how to expand yourself.

Cracking

Whats cracking?

Simply said you download an account list (combo) use a software that tries to log into the account with your ip and if its correct it lets you know and shows data of the account

Is it free?

You can do it free but I recommend an investment of at least 10$ to properly start

Is it illegal?

yes, but don’t be scared its hard to track and not worth it as in most cases they only have your IP except if you order stuff to you (to your address)

Investment?

You need a couple of things later but its not required at the start. I will still tell them: combo,proxies,software you can also create combos yourself but then again you need more money to spend. But there are also free alternatives for combo and proxies

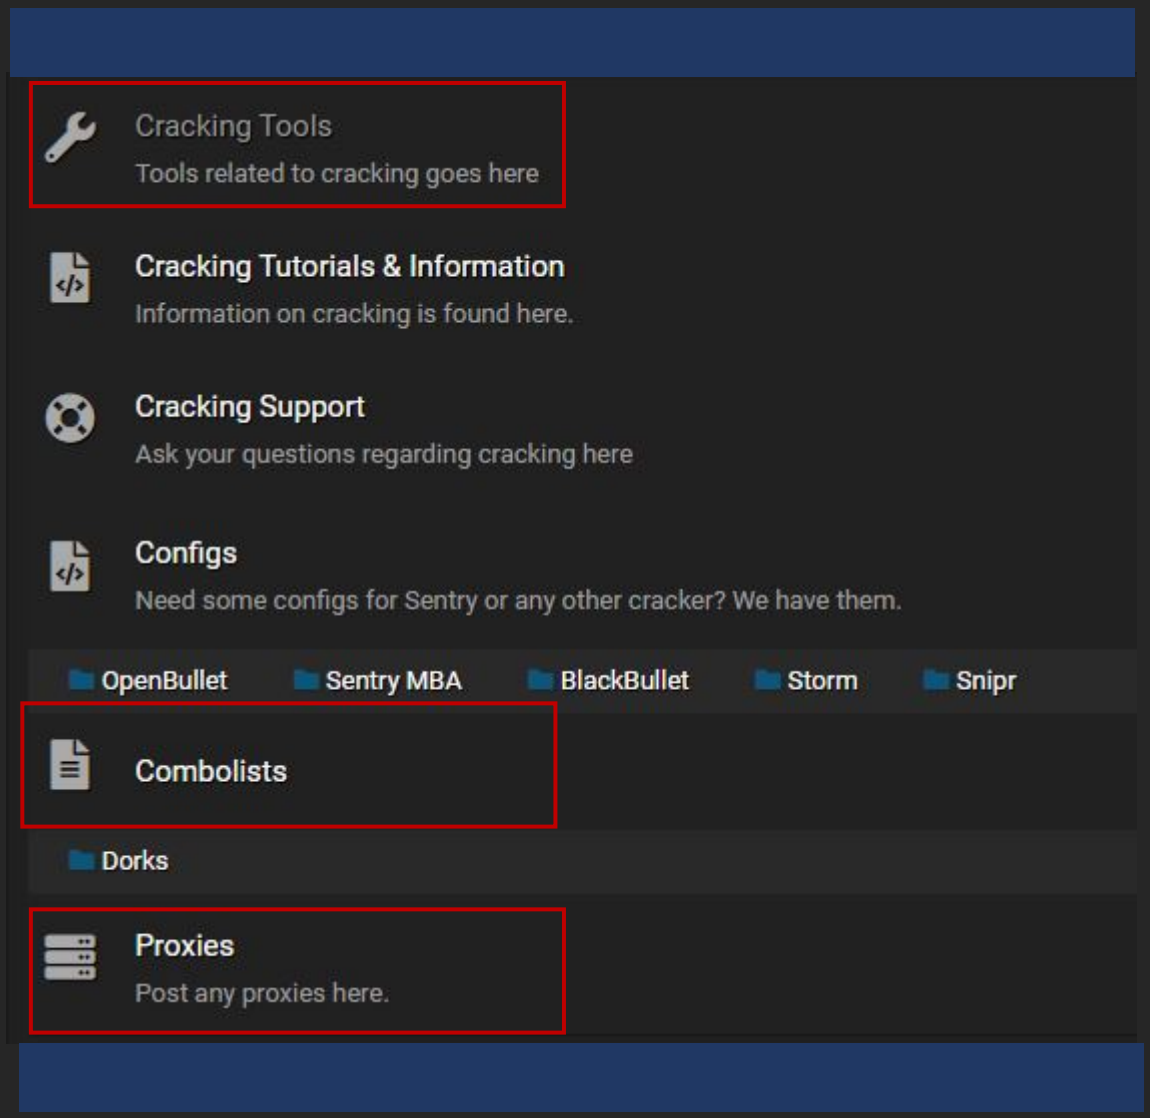
Am I hacking accounts?

No a combo is a part of a database which saves accounts you simply load the account list into a tool and the tool checks if you can log into the account

How to start

You need 3 things: software, combo , proxies

You can find everything in the combo section : (click here)

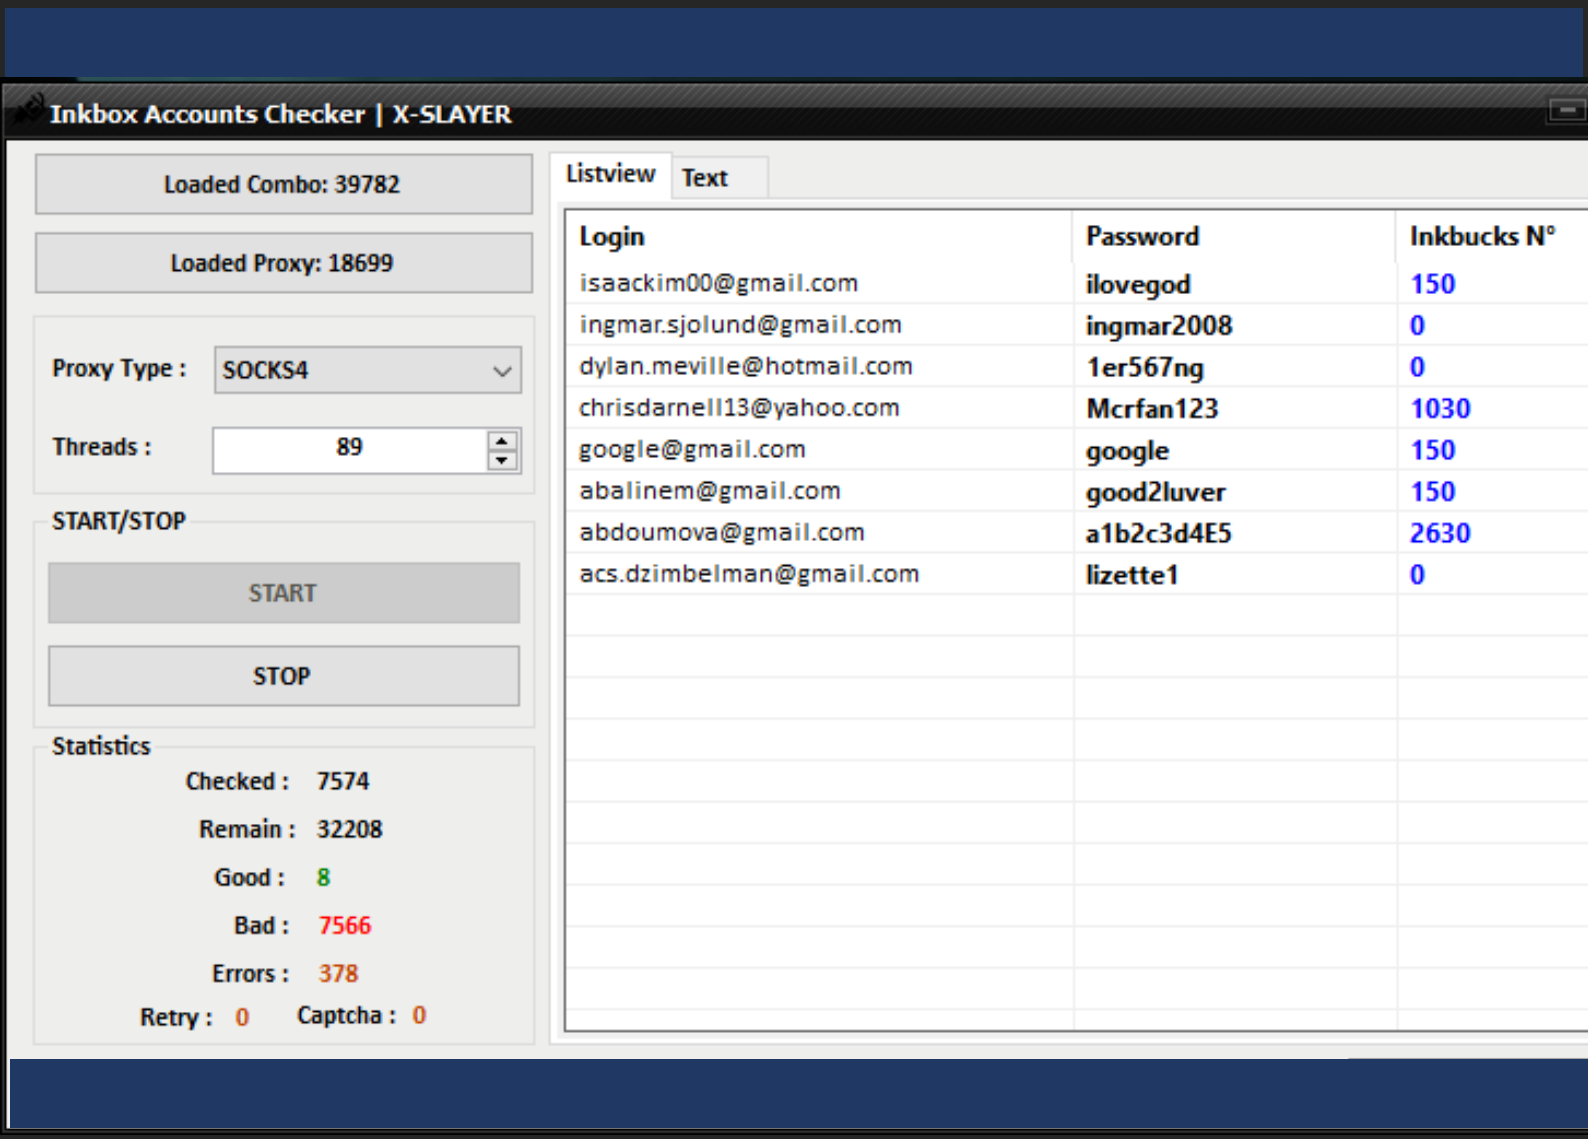


Download a tool but be careful there are many tools prefer downloading

Tools from trusted people. I didn't check it but he is legendary and a known coder so I will refer to his "toolpack" (click here)

But as it's already in the thread use a vm/sandbox and a rdp

Many cracking tools looks different but the structure is similar which I will explain on the next picture



This is “X-Slayer” there are multiple checkers but the structure is the same

Combo – load the Account list the number behind is how big the account list is

Proxy – Ip´s that will be used to check the account as you wont use yours

Proxy type - style of the IP (more information)

Threads – speed of the bot

Start will start the software on the right you see the the account data and how many games / the account content (money,games,plan,inventory)

Checked is how many accounts are checked and remaining is how many still need to be checked good is account that are working and bad that didn’t work

You need a rdp or its very recommended because if you shutdown your pc the software will stop to work and you need to check everything again

An rdp is a remote desktop protocol simply said it's a virtual server/pc which you can use like a default computer but the positive things is the server runs 24/7 which is great but now the first investment comes but one of the most important to start these servers cost money or atleast if you want something stable there are methods / tutorials to get free ones but I didn't try that and I heard they ban your server fast.

An rdp provider is rdp.sh its simple to use you decide what server you want

and then buy it and then there will be data which you can connect with

Windows has something pre installed which is called "remote desktop connection" you enter the data and connect to it

It has already a browser and everything setup to use it defaultly you now need to download the software and combo there and then let it run and when its done save it somewhere

you can buy combos or a combo edit tool which makes your combo better

(private hits) or proxie which makes it possible to crack other websites as some websites as epicgames / Netflix require good ones and you cant crack them with free ones

The Nulled User GUTS has good tutorials regarding cracking

I recommend him or read the tutorials here (click here)

You can sell your Accounts if you don’t know what to crack go into the account section and check whats popular as example there was another ghm event and spotifiy got raped and you could sell ghm codes for 0.50 or the ghm itself for 2.50$+

Or contribute and reach contributor (250 likes) or royal (500 likes) there are more ranks but you should aim first for them if you want

If you want to sell/buy accounts the premium section has an own section for cracking related things:

Combo / Config : (click here)

Accounts : (click here)

I recommend to make an own shoppy so people can autobuy

(buy your accounts even when you are offline)

Social Engineering

Whats Social Engineering?

Its manipulating people simply **(more information)**

Is it free?

You can do it free but sometimes you need things which you need to buy

Is it illegal?

Depends on how you use it but yes it is and people already got into jail for it and its more illegal than cracking or you can easier get caught

Investment?

You need software and proof there are ways to optain it but a good thing is its free but depends on how you use social engineering

Refunding & Warranty

Refunding is buying something and then complaining its missing or empty the package in order to receiving your money back

Warranty is faking evidence and manipulating the costumer service so it looks like you own the product and have trouble with it so you get a replacement (a free product)

How to start

First I will explain some keywords

Refund – getting money back

Serial Number – a number to check warranty or product identification

Drop – a location that is not connected with you

Reship – a company that forwards your packages to you

Bill – a invoice you need to pay

Invoice – a invoice as proof

DNA – did not arrive

EB – empty box

I will explain refunding first I will keep it basic as I don’t want to explain everything and make it 100 pages also to not saturate it heavily

Refunding

Search a store and then order from there I recommend to use a low amount

Lets say 100$ on amazon order your product and after you received it you contact the company and say the package was empty or it didn’t even came

As costumer satisfaction is important, they will simply give you the money back but you keep the items so you manipulated them thinking it was missing and you had trouble

Warranty

Search for a company, easiest companies are food but electronic is also fine

Lets say monster energy as an example

The bottles have a code at the bottom so go into a supermarket take a bottle and make a picture of it so you have the code (can be counted as sn)

Go to the monster energy page to contact and message them that you bought it and later you drank it you felt strange and bad and after you went to toilet it was black (complain that you felt strange after you drank it)

They will ask for the code you provide it to them then ask for your address and stuff and will send you a tray 5-10 cans for free as compensation

So now you profited 10 monster energy’s

You only went to a store and took a picture/wrote down a number

This can be adapted to many food/drinks companys

Expanding

Social Engineering has an own section in case you don’t know

Link: (click here)

There are many tutorials and you can find serial numbers there or buy them

Its simple just read them and try some you can also buy methods or mentoring

Join groups or communities for social engineering

I wrote an ebook about it with 70 pages if people are interested I can sell it again

Its simple there are many tutorials read them get software connect to people and try there are many methods and even more companies

E-whoring

Whats e-whoring?

Its taking the identity of a person and acting as her and sell nudes or other stuff

Monetizing yourself

Is it free?

You need some things but you can start with 0$

Is it illegal?

It isn’t ethical for many and its annoying to get dickpics depending on your country it is illegal as example faking an identity

Investment?

You can invest into a pack or traffic source or buy a book about it to learn things but you don’t have to and don’t even need it as its simple

Ethical?

You scam people , maybe blackmail them or let them fall in love with you so you get money there are many ways to monetize it but some religions doesn’t allow it or its simply not good

How to start

Go to the Nulled section money and then e-whoring if you cant find it

Here is a link (click here)

There are ebooks, sources, traffic, girl packs

You need to find a girl and download her pictures and then search for a ebook or a traffic list if you cant find one I had several ebooks about e-whoring so go to my profile and open these and read through to it : (click here)

Alternative go to a chatroom and put pictures of you and chat with people

Depending on what your goal is act differently often its good to focus old people as they have more money and like “young girs” and are easier to convience

There are also fetishes or sugardaddys you can be creative or use social media or an own website your creativity decides and ideas how much you do

You might need to do it for a while as the first person wont prop give you 1000 bucks but many people did 3000$ in 1month it very much depends but e-whoring can be a goldmine

Expand

Communicate with other e-whoring people and get traffic an a own or atleast good e-whore pack which is private and some ideas to talk or ask for money as the “money for rent” excuse gets saturated

Monetizing Internet

What exactly can I do?

It’s a big topic and there are many methods or niches as example pod or dropshipping or simply money methods / reselling which is kinda real life

Is it free?

Depending on what you do it can require money but you can start for free or choose a free method

Is it illegal?

There are whitehat (legal) greyhat (half or not sure) blackhat (illegal methods)

So yes and no there is both not every method is legal / illegal

Investment?

Some methods require a investment but as before you don’t have to try to get your own tweaks to it so maybe you can make the method even better

Get Rich fast?

Something like that doesn’t exist many methods don’t work unless you invest much time into it or add own tweaks the methods often give you ideas but if you try to follow it you don’t get money as promised however there are good methods

How to start

There are many ways or multiple sections most of the information will be in the leak or money section

Money section link:

(click here)

Ebook Guides and tutorials section link:

(click here)

Download a ebook or read a tutorial and simply try to follow it there isn't a right way depending on how much money you have or can invest

If you have much money to spend : reselling or counterfeits both is or can be illegal but you can expect high profits then you could make a dropship store or a other method maybe even buy views and sell it to others

Also depends if you are ok with doing a illegal (blackhat) method if yes you could do scamming or something else

Expanding

The ways are endless to expand yourself you can buy courses either on the forum or other websites as knowledge is power or buy ebooks but don't buy everything, many ebooks are false advertised wait for vouches and compare it or use a middleman if he allows it

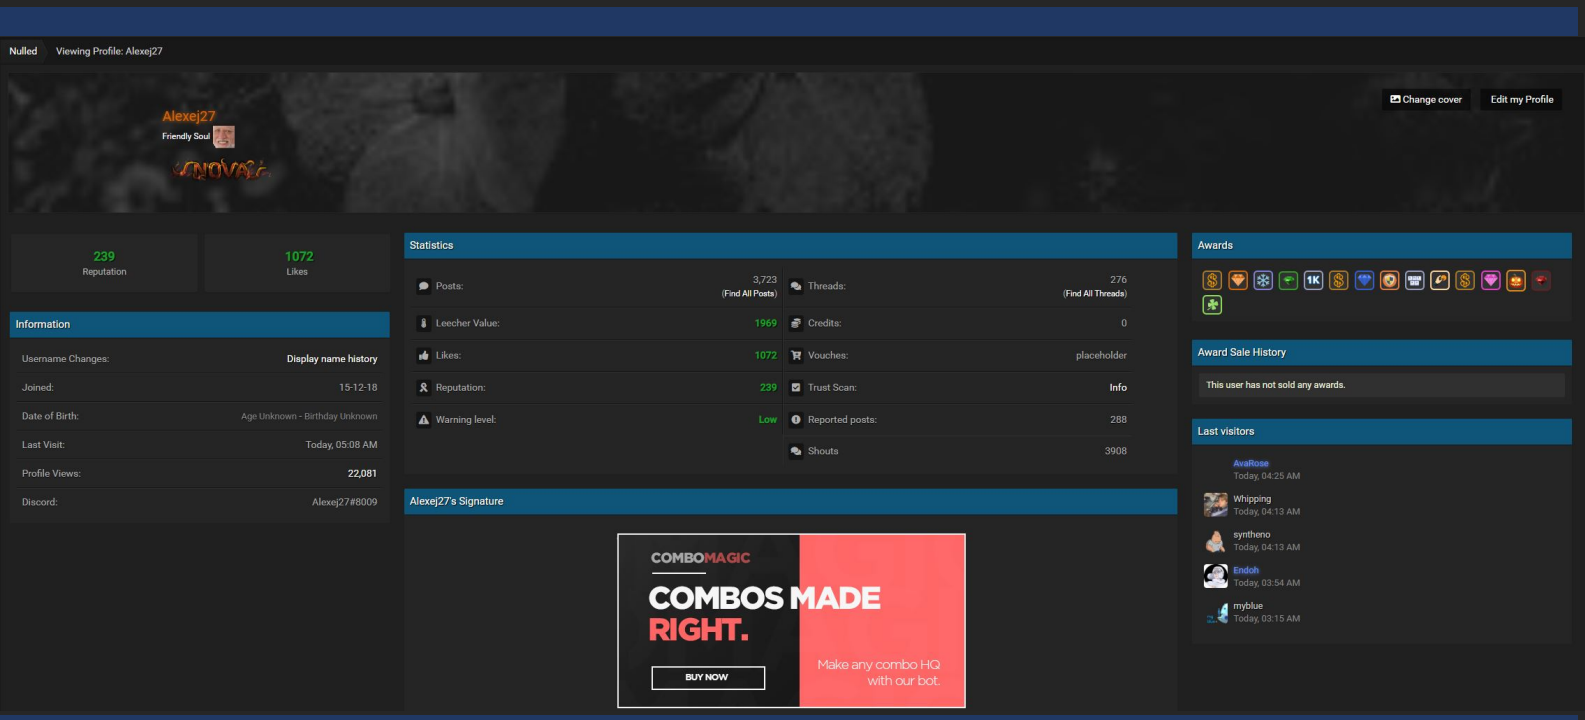
Link to ebook section :

(click here)

Profile

Everyone has a profile you can either ignore it but many people look at it and depending on how you use it or make it look it has different effects I will show mine and explain things

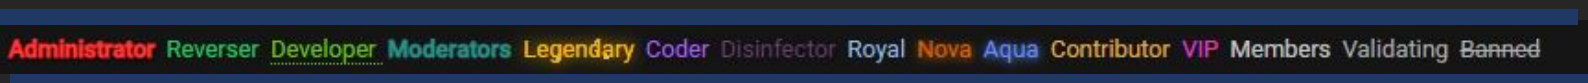
Click on the picture to get a imgur link or zoom it so its bigger



My Name is Orange the color of your Name depends on your UG (Usergroup)

There are Multiple Usergroups below the “friendly soul :emoji:” is the usergroup in my case Nova

Most of the things are self-explaining like threads or likes / reputation



Administrator Reverser Developer Moderators Legendary Coder Disinfector Royal Nova Aqua Contributor VIP Members Validating Banned

~~Banned~~ - a user that got banned on Nulled

Validating – that has to confirm his email

Member - a default grey user

Vip – 10€ for 1month (paid ug)

Contributor – 250 likes requirement

Aqua – 35€ lifetime rank (paid ug)

Nova – 50€ lifetime rank (paid ug)

Royal – 500 Likes

Disinfector – people who tested files and tested them for viruses

Coder – someone with outstanding coding skills

Legendary – 1500 Likes

Moderator – staff of nulled

Developer – someone with outstanding developing

Reverser – Finndev has it

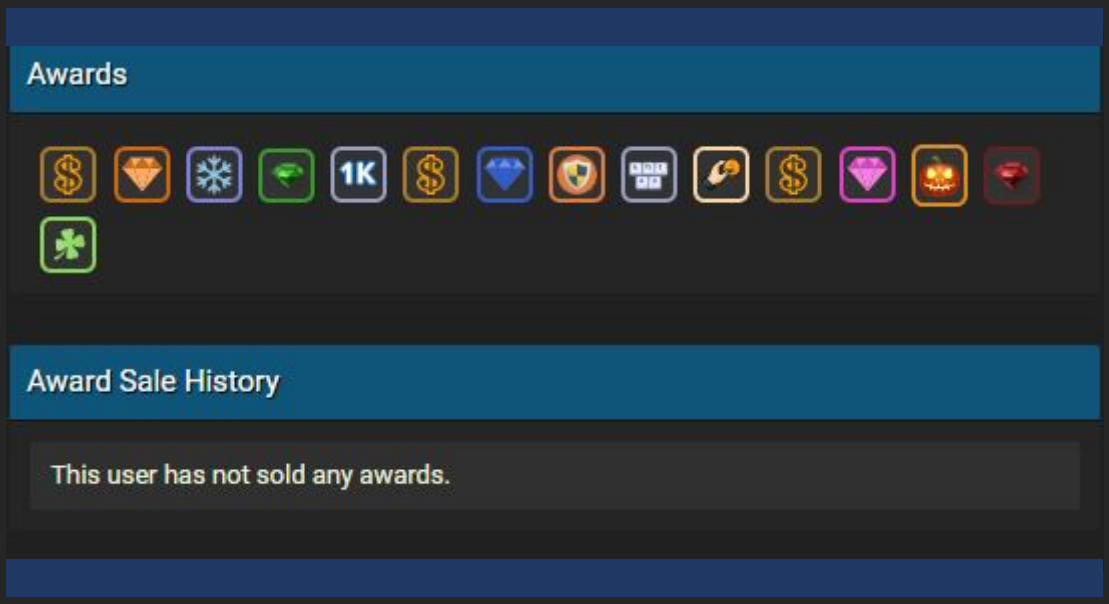
Administrator – Admin of the Website

There are a more few UG but they are not listed:

Godly – 3000 Likes

Heavenly – paid ug that got bought 25K and a slot 10K

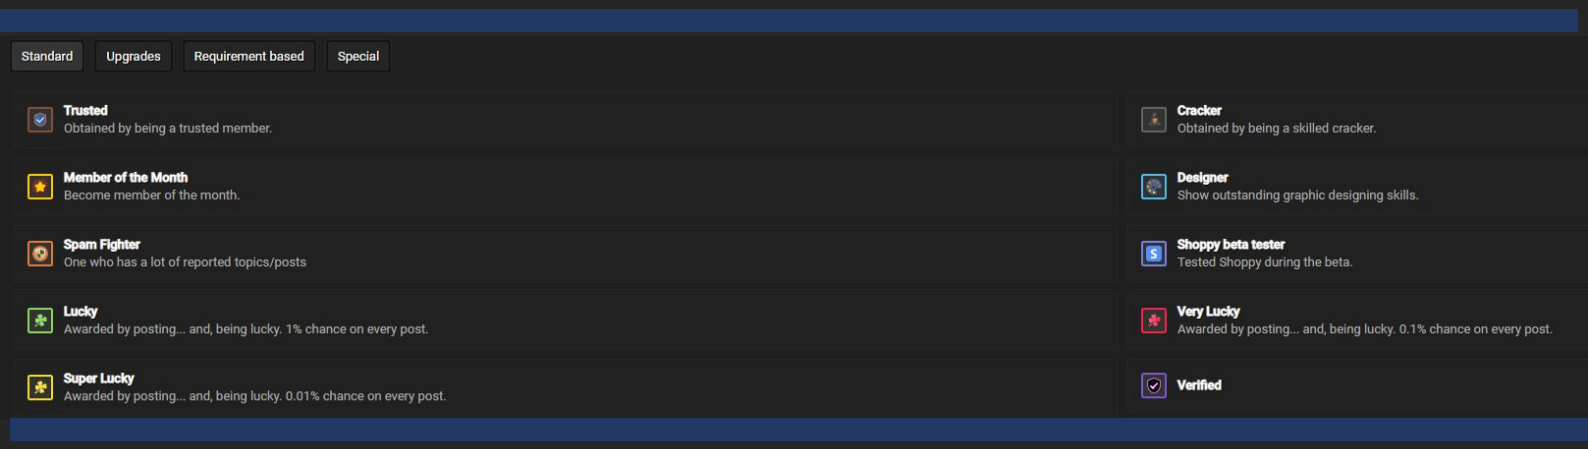
Insane – paid ug that is not for sale anymore



Awards are achievements or things to show of in your profile every Award has an own reason or can be obtained from events or through requirements like buy 10 credits or get 400 reputation

There is a link with tutorials / explanation how to get it if you don't find it

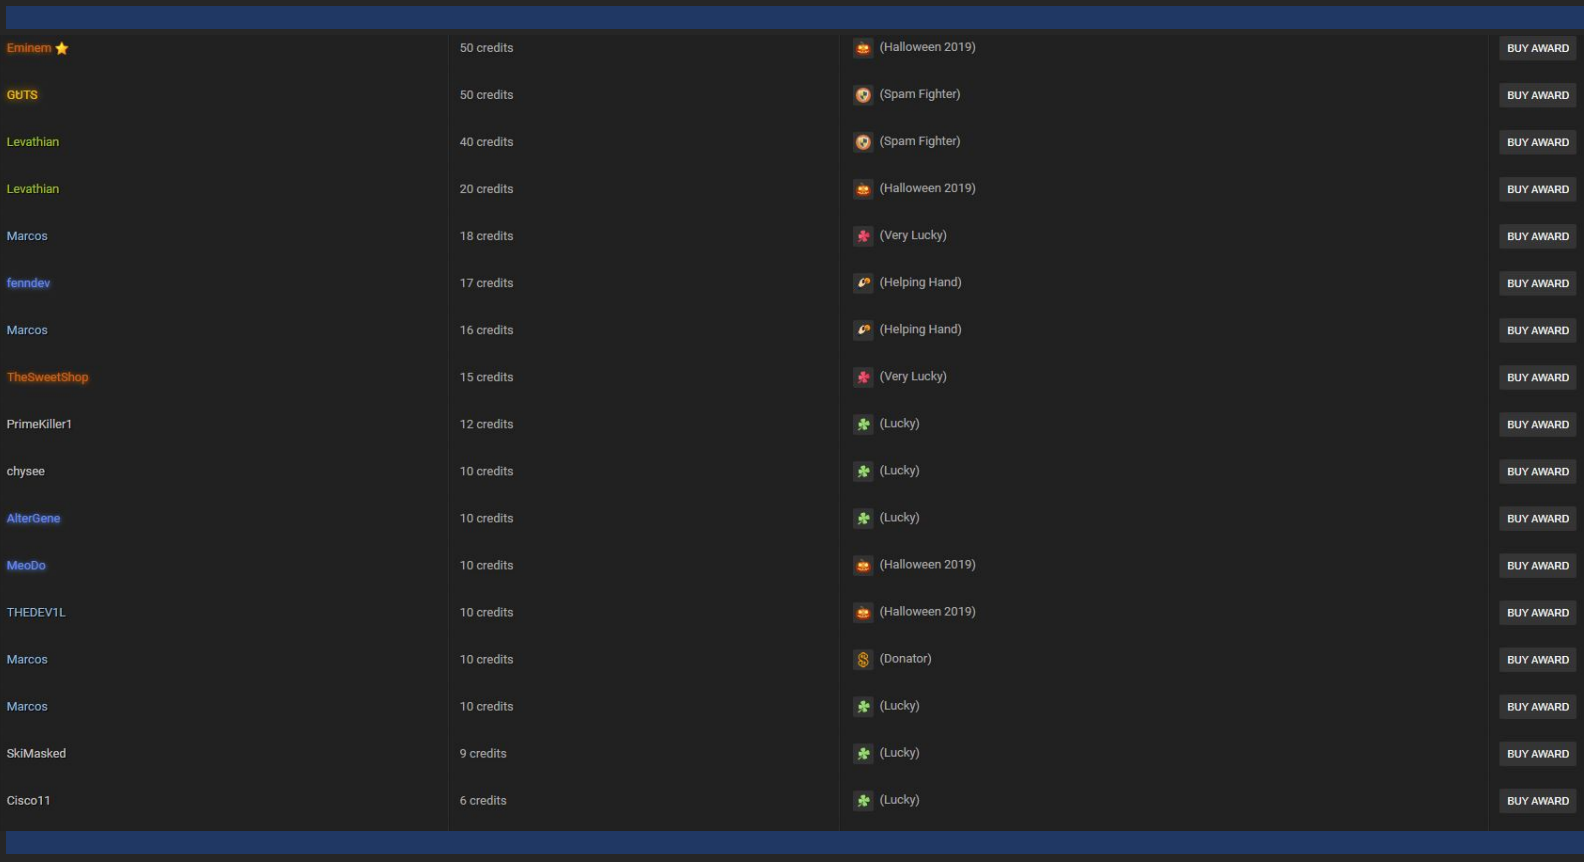
Here is a link: (click here)



Standard
Upgrades
Requirement based
Special
Trusted
Obtained by being a trusted member.
Cracker
Obtained by being a skilled cracker.
Member of the Month
Become member of the month.
Designer
Show outstanding graphic designing skills.
Spam Fighter
One who has a lot of reported topics/posts
Shoppy beta tester
Tested Shoppy during the beta.
Lucky
Awarded by posting... and, being lucky. 1% chance on every post.
Very Lucky
Awarded by posting... and, being lucky. 0.1% chance on every post.
Super Lucky
Awarded by posting... and, being lucky. 0.01% chance on every post.
Verified

You can't get some awards anymore as the time is simply over as example Shoppy beta is over and Halloween 2016 award was 4 years ago

But some of the awards can be bought because there is an award marketplace and there you can sell awards for credits



Eminem	50 credits	(Halloween 2019)	BUY AWARD
GUTS	50 credits	(Spam Fighter)	BUY AWARD
Levathian	40 credits	(Spam Fighter)	BUY AWARD
Levathian	20 credits	(Halloween 2019)	BUY AWARD
Marcos	18 credits	(Very Lucky)	BUY AWARD
fenndev	17 credits	(Helping Hand)	BUY AWARD
Marcos	16 credits	(Helping Hand)	BUY AWARD
TheSweetShop	15 credits	(Very Lucky)	BUY AWARD
PrimeKiller1	12 credits	(Lucky)	BUY AWARD
chysee	10 credits	(Lucky)	BUY AWARD
AlterGene	10 credits	(Lucky)	BUY AWARD
MeoDo	10 credits	(Halloween 2019)	BUY AWARD
THEDEV1L	10 credits	(Halloween 2019)	BUY AWARD
Marcos	10 credits	(Donator)	BUY AWARD
Marcos	10 credits	(Lucky)	BUY AWARD
SkiMasked	9 credits	(Lucky)	BUY AWARD
Cisco11	6 credits	(Lucky)	BUY AWARD

Everyone can sell awards but awards start at 6 credits (6€) you can't sell them lower awards go up to 200$ and much higher but in these cases, people are often just trolling as nobody will buy an award for 3000€

Some of the awards can only be once purchased except some awards like donator or master donator to buy them once use the marketplace for (6€)

Then you have to buy them from here : (click here)

You can't sell every award but there are multiple that you can sell

You now heard multiple time "credits"

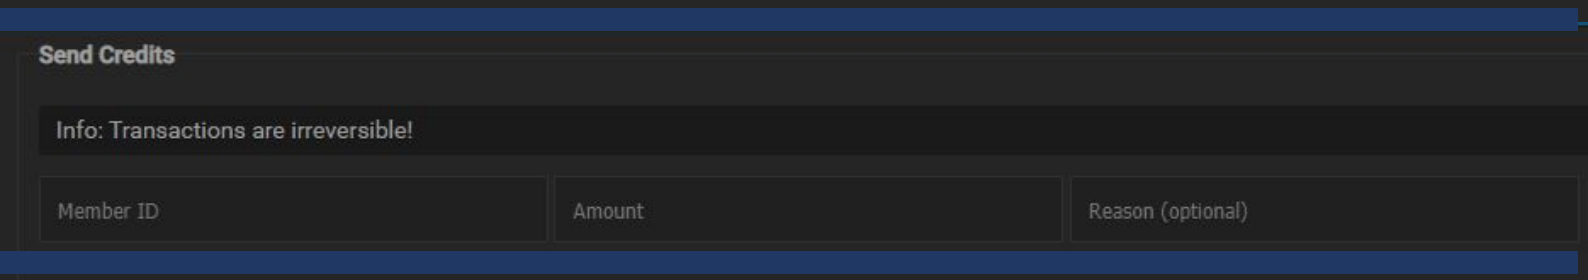
Credits are used as money 1 credit = 1€ you can use it to buy awards or items / in the marketplace to pin or color your thread

you need to buy credits with crypto currencies

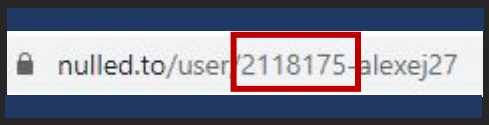
to buy credits go here: (click here)

You can send credits to other users if you want to buy something or trade them

To send them there is a extra page [(click here)]



You need the Member ID which can be found in the profile of the Member it's the Number and the reason but its optional



The Member ID is the number before the name in my case "2118175"

Feel free to send me credits kappa

We now talked about awards but there is also more than it there are items

You can choose from money items such as flags or icons like BTC or Money

Items doesn't have effects and are mainly for decorations except a few

The overview of the items can be found here: (click here)

You should now see icons the items and flags doesn’t have effects and the icons that are called special have effects

You can give reputation depending on your UG

vip (+1 / -1)

aqua (+2/-2)

nova (+3/-2)

and if you buy verified your reputation doubles (x2)

means

vip (+2/-2)

aqua (+4/-4)

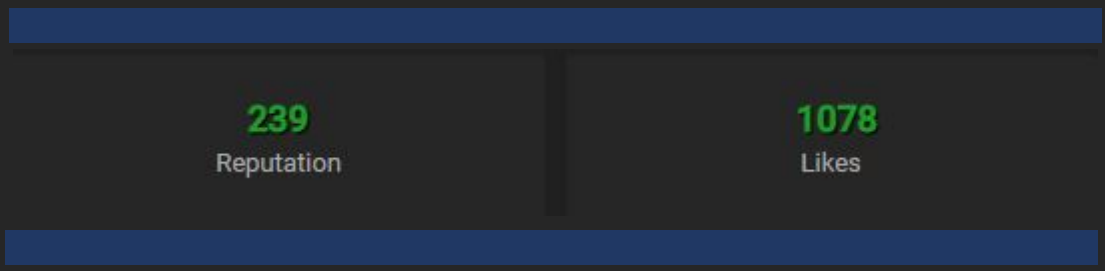
Nova (+6/-4)

And the diamond doubles it again to buy the diamond you need verified first

The verified icon costs 600 and the diamond 600 so you need to pay 600 or 1200

Contributing

Contributing is important if you want to grow on nulled



This are my current stats (05.01.2020)

Goals can be reputation, likes , connections or a usergroup

There are multiple ways to contribute

I reached my first 100 likes simply through being active and trying to help other users as example answering questions sharing my thought and ideas sometimes writing jokes or posting memes nulled doesn’t have to be reddit or a other place but it isn’t bad to help other people

If you don’t know the answer you can try to google it for the person or write what you think / your opinion as that’s what the people need often

a other way is cracking accounts (above explained) and then not sell these accounts but post them in

teaching others or sharing your knowledge can be a very good contribution

You can code? Make tutorials how to code or even sell your knowledge to others

You can make a Website? Teach it to others or offer websites or templates

You can also learn things and then show how you learned it or your thoughts as you are learning it differently than the person before and have a different understanding

You have tutorials or know a way to make money? Share it people will like your post if they appreciate it / like it

but remember asking for likes isn't allowed its not important if you say: hey give me a like or say please give me good feedback or hit the green arrow its asking for likes just differently so just don't do it

people are horny or looking for porn so you can crack mega.nz accounts as somehow many people save such videos or pictures there and you can crack accounts and after you find something related to it you upload it on Nulled

FAQ

Question	Answer
With what should i start first?	Depending on your time and money and what's ethical for you there are many ways to start just read above
I lost my rank	Try to choose your rank here
I got scammed and need help	make a thread here and follow the format
How much are credits?	1 credit is 1€
How to get Royal?	Contribute
Vc?	No kappa
I am banned	Make a thread in the support section

Glossar

What's a glossar?

Its keywords or words that you might don't know written and explained

Nulled – a forum that is mainly for cracking but can be also used for other things

Cracking – checking other accounts

SE/Social Engineering – manipulating people

Ehworing – taking the identity of a girl to make money

Pleb – small/unknown person

Grey – a default nulled user without upgrades or contributor or higher

Skem / bikk – other words for scam or big

Ebook – a digital book that can be read on pc or smartphone

Leecher – someone who isn't contributing and just using the website to get free stuff

Vouch hunter – someone who got royal or higher and uses his rank to get free stuff while not writing proper reviews

Vouch – a free copy in exchange for a detailed review

MM – Middleman a third member who handles the deal so nobody gets scammed

Impersonator – someone faking the identity of a member

Discord – software to communicate

Telegram – software to communicate

Credits – currency of the website

Imgur – a website for pictures upload and download

Gyazo – picture and gifs website for upload and download

Confirming – checking the identity of the member
